

RecVue Billing & Invoicing

Configurable billing and pricing for all business needs

An era of limitless customer expectations demands the capability to anticipate, not react

The expectations and maneuverability needs placed upon enterprise business in today's world of digital transformation change by the virtual minute. The modern billing platform tasked with adapting to this multi-headed monster of choice should be flexible enough to account for every variety of revenue model of today and tomorrow with consistency and accuracy.

In determining where we're at, it's instructive to re-visit where we've been. Consider the old versus new in large-scale business-tobusiness (B2B) billing:

The old linear layout...

Design a widget → Build it → Sell it → Invoice for it → Collect fees for it → Recognize revenue for it

...has given way to today's subscription and hybrid business models which include extra considerations and elements such as:

Start and end dates

Upgrades and downgrades

Usage billing and data mediation

Pause and resume subscription

Renewals and evergreens

Cancellation and termination

Configurability and Flexibility for Any Billing Model

Now envision all those elements on a single invoice with the option to reference either a single contract or multiple contracts and amendments, all without manual intervention. Built with the foresight to handle this at scale.

Any and all types of billing should be within reach for an order-to-cash platform enabling full-fledged enterprise capabilities, including:

One-time billing (traditional)

Asset billing

Custom billing frequency

Recurring billing (subscription)

Lease billing

Professional services

Usage-based billing

Businesses today recognize the importance of having a sophisticated billing platform capable of adapting on the fly for every revenue model on the market. Your customer isn't going to scale back on expectations any time soon and neither should your billing platform. Only a top-tier solution such as RecVue's Billing & Invoicing is capable of fulfilling these expectations with adaptability, accuracy and a well-crafted user-friendly, configurable interface.

All Billing Needs In a Single System

RecVue's robust billing engine was specifically created to cater to all revenue models central to today's business requirements and flexible enough to address all configurable pricing models.

- | | |
|---|--|
| ✓ Ingest data in any form necessary depending on billing flavor, including asset billing and payments, lease billing, usage billing and hybrid options | ✓ Capture each step and data exchange along the audit trail |
| ✓ Normalize usage data through a built-in data mediation layer (DML), offering user-friendly import, control and consumption flexibility | ✓ Set up customer-specific, rule-based pricing for all complex pricing models |
| ✓ Adjust billing corrections via credit/debit, as needed | ✓ Support for multiple currencies and transaction-level override |
| ✓ Price ramp up/CPI for recurring billing | ✓ Deliver all essential capabilities within one unified platform |
| ✓ Provide tiered support through multi-dimensional pricing | ✓ Out-of-the-box integration to tax engines and any ERP system |

Built with the throughput objectives of performance and scalability in mind and the foresight to directly take on the challenges faced by billing platforms preceding it, RecVue's billing solution takes big data in stride to deliver reporting output in minutes compared to hours for competitors.

RecVue's nimble microservices design significantly levels up the playing field to not only meet the needs of end-users in any industry with all manner of revenue models, but anticipate the challenges those end users did not yet see on the horizon.
